## PROJECTS

### Hotel Room Booking Website

DECEMBER 2020

It is an interface which provides details of every room in Beach Resort and gives the option to filter rooms according to the user's needs and rent room as well.

Live At: <https://resortwebsite.herokuapp.com>

**Technologies Used:** ReactJs, JavaScript, HTML5, CSS3

### Real-Time Chat Application

SEPTEMBER 2020

It is a chat interface in which two or more users can chat, Where all the chat is disposable i.e when an user leaves the chat room his/her conversation will be deleted.

Github Repository: <https://github.com/daman-kinra>

**Technologies Used:** ReactJs, NodeJs, Socket.io, JavaScript

### Weather Application

AUGUST 2020

It is an Application which shows the real-time weather of a particular location based on the user's search result. Its responsive UI makes this application accessible on mobile as well as desktops.

Live At: <https://weather-app.herokuapp.com>

**Technologies Used:** ReactJs, JavaScript, HTML5, CSS3
